English Noise Canceling Headphones

## WARNING

Do not expose the battery to excessive heat such as direct sunlight, fire or the like.

### For customers in the USA

The following FCC statement applies only to the version of this model manufactured for sale in the USA. Other versions may not comply with FCC technical regulations.

### Note

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

If you have any questions about this product, you may call: Sony Customer Information Service Center 1-800-222-7669 or http://www.sony.com/

### Declaration of Conformity

Trade Name: SONY  
 Model No.: MDR-1RNC  
 Responsible Party: Sony Electronics Inc.  
 Address: 16530 Via Esprillo, San Diego, CA 92127 USA  
 Telephone No.: 858-942-2230

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### For customers in Canada

The validity of the CE marking is restricted to only those countries where it is legally enforced, mainly in the countries EEA (European Economic Area).

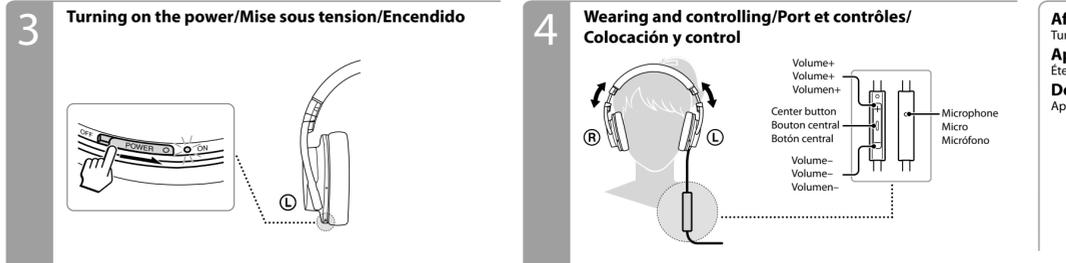

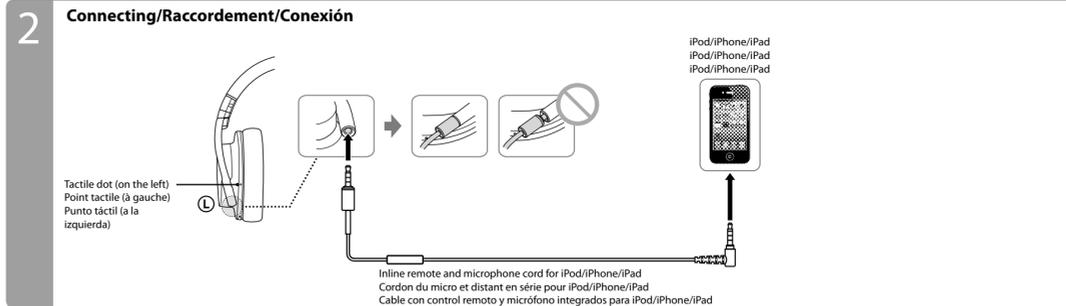

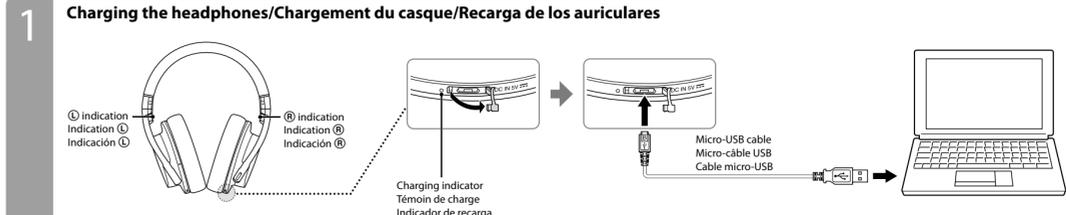

This Class B digital apparatus complies with Canadian ICES-003.

## Checking the remaining battery

Status	POWER Indicator	Beep sound
Full	Blinks 3 times *	No beep
↓	Blinks 2 times *	No beep
Low	Blinks 1 time *	No beep
Empty	Blinks quickly (30 seconds)	Long beep (2 seconds)

\* When turning off the power of the headphones.

## How to use/Mode d'utilisation/Modo de uso

## Checking the charging status

Status	Charging indicator
Charging	On
Full	Off
Charging malfunction	Blinks

## Using the Center button (Inline remote and microphone cord for iPod/iPhone/iPad)

Operation	Explanation
Single press	Plays/pauses a track of the connected iPod.
Double press	Skips to the next track.
Triple press	Skips to the previous track.
Long press	Starts the "VoiceOver**" feature (if available).
Press once when call is incoming	Answers the call.
Press again	Ends the call.
Hold down for about two seconds and release	Rejects an incoming call (two low beeps confirm the call was rejected).

\* Availability of the "VoiceOver" feature depends on iPod and its software version.

### Note

Be careful not to unintentionally press any buttons when you carry your iPod with this headphones connected.

## Automatic AI Noise Canceling

The Automatic AI Noise Canceling function constantly analyzes environmental ambient sound components and automatically selects the most effective noise canceling mode.

### Noise canceling mode types

- NC Mode A: Noise mainly in an airplane is effectively reduced.
- NC Mode B: Noise mainly in a bus or a train is effectively reduced.
- NC Mode C: Noise mainly found in an office environment (PC, copier, air ventilation, etc.) is effectively reduced.

### Tips

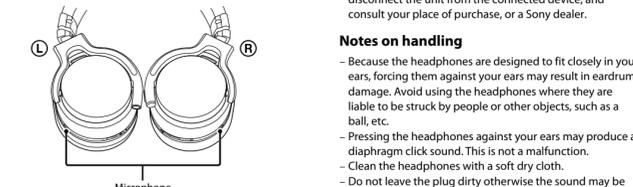

- When the headphones are turned on, NC Mode A is set.
- It may take a few seconds to analyze the environmental ambient sound.

## Notes on use

The noise canceling circuit actually senses outside noise with built-in microphones and sends an equal-but-opposite canceling signal to the headphones.

### Notes on the noise canceling function

- Adjust the earpads so that they cover your ears, otherwise noise canceling will not function properly.
- The noise canceling effect may vary depending on how you wear the headphones.
- Do not cover the microphone of the headphones with your hands. The noise canceling function may not work properly.

- After you turn on the power of the headphones, you may hear a slight hiss. This is the operating sound of the noise canceling function, not a malfunction.
- The noise canceling function works for noise in the low frequency band primarily. Although noise is reduced, it is not canceled completely.
- The noise canceling effect may not be pronounced in a very quiet environment, or some noise may be heard.
- When you use the headphones in a train or a car, noise may occur depending on street conditions.
- Howling may occur if you do not wear the headphones correctly.

### After use

- Turn off the power of the headphones
- Après utilisation Éteignez le casque
- Después del uso Apague los auriculares

### Notes on headphones

- High volume may affect your hearing. For traffic safety, do not use while driving or cycling.

### Notes on using on the airplane

Do not use the headphones when use of electronic equipment is prohibited or when use of personal headphones for in-flight entertainment services is prohibited.

### Notes on charging the headphones

- Charge the headphones using the supplied micro-USB cable. Otherwise, it may cause a malfunction.
- Charge in an environmental temperature of between 5°C and 35°C. Otherwise, the battery may not fully charge.
- Do not store the headphones in hot places for a long time. When storing it for more than a year, charge the battery once a year to prevent over discharge.
- For system requirements for a computer that can charge the battery using USB, see "System requirements for battery charge using USB".
- If you recharge the headphones by connecting to an AC outlet, use the separately-sold USB AC Adaptor specific in "Recommended accessory (sold separately)". For details, refer to the operating instructions supplied with the adaptor.
- If the headphones are malfunctioning, charging will not start and the charging indicator will blink. In this case, disconnect the unit from the connected device, and consult your place of purchase, or a Sony dealer.

If you have any questions or problems concerning the system that are not covered in this manual, please consult the nearest Sony dealer.

## Troubleshooting

### No sound

- Recharge the headphones.
- You can listen to the music using the headphones even when the POWER switch is set to "OFF". In this case, the noise canceling function, Digital Equalizer, S-Master and DSEE are not active, and the headphones operate as passive headphones.
- Check that the rechargeable battery is not depleted.
- Check the connection of the headphones and the equipment.
- Check that the connected equipment is turned on.
- Turn up the volume of the connected equipment.

### The noise canceling effect is not sufficient

- The noise canceling function is effective in low frequency ranges such as airplanes, trains, or offices (near air-conditioning, etc.) and is not as effective for higher frequencies, such as human voices.
- Turn on the headphones.

### Distorted sound

- Turn down the volume of the connected equipment.
- Recharge the headphones.

### Power does not turn on or the headphones do not operate properly

- Recharge the headphones.
- If the power does not turn on, even after charging the headphones, the rechargeable battery may be damaged. In this case, consult your place of purchase or a Sony dealer.

### Charging cannot be done

- Check that the charging indicator lights up. Connect the headphones and the micro-USB cable securely.
- Check that the micro-USB cable and the computer are firmly connected.
- Check that the micro-USB cable and the computer are directly connected; not via a USB hub.
- Check the system requirements for a computer that can charge the battery using USB.
- Check that the computer is turned on.
- Check that the computer is not in standby, sleep or hibernation mode.
- If the charging indicator blinks (blinking patterns: about 30 seconds on and 3 seconds off), you are using an adaptor other than the recommended one. Use a USB AC Adaptor specified in "Recommended accessory (sold separately)".
- If the charging indicator blinks, the headphones may be malfunctioning. Disconnect the unit from the connected device, and consult your place of purchase, or a Sony dealer.

### The unit cannot be recognized by a computer

- Check that the micro-USB cable and the computer are firmly connected.
- Disconnect the micro-USB cable from the computer and connect again.
- Check that the micro-USB cable and the computer are directly connected; not via a USB hub.
- There may be a problem with the connected USB port of the computer. Connect to another USB port if it is available.
- Try the USB connection procedure again in cases other than those stated above.

### No operation works

- Set the POWER switch of the headphones to "OFF", confirm the connections, and then set the POWER switch back to "ON".
- Reset the headphones. Insert a small pin, etc. into the RESET button on the left housing, and press until the button slightly rebounds.

### The connected iPod does not work

- Check if the cord is connected correctly. Connect the L type plug to the iPod and the other plug to the headphones.

## Features

### Digital Noise Canceling with Dual Noise Sensor Technology

Microphones both inside and outside the housings are combined with digital noise canceling software engine to deliver significant noise canceling performance.

### Automatic AI (Artificial Intelligence) Noise Canceling function.

Automatic selection of the optimal noise canceling mode based on intelligent analysis of environmental ambient noise.

### Digital Equalizer and full digital S-Master amplifier

Delivers ideal frequency response and high-quality music reproduction with full digital processing.

### DSEE

Offers natural sound with a spacious feel by restoring high-frequency range sound and the tall shape of the waveform likely to be removed through the audio compression process.

### Passive operation

Allows audio listening even when the headphones power is turned off.

### Detachable cord

### Included items

- Headphones (1)
- Inline remote and microphone cord for iPod/iPhone/iPad (1.2 m (47 1/4 in) cord, using PCOCC, four-conductor gold plated L-shaped stereo mini plug) (1)
- Micro-USB cable (1.5 m (59 1/8 in)) (1)
- Carrying case (1)
- Operating Instructions (1)
- Warranty card (1)

### Recommended accessory (sold separately) <sup>6)</sup>

USB AC Adaptor: AC-UD20

- <sup>1)</sup> Under the Sony measurement standard.
- <sup>2)</sup> Equivalent to approx. 99.7% reduction of energy of sound compared with not wearing headphones.
- <sup>3)</sup> At 1 kHz, 0.1 mW + 0.1 mW output
- <sup>4)</sup> Hours required to fully charge an empty battery
- <sup>5)</sup> Time stated above may vary, depending on the temperature or conditions of use.
- <sup>6)</sup> Availability depends on the country.

Design and specifications are subject to change without notice.

## Compatible iPod/iPhone/iPad models

- You can use the headphones with only the following models supporting remote control. Update your iPod, iPhone or iPad to the latest software before use. In the Operating Instructions, iPod, iPhone and iPad are collectively described as "iPod" except in special cases.
- iPod touch (4th generation)
  - iPod touch (3rd generation)
  - iPod touch (2nd generation)
  - iPod nano (6th generation)
  - iPod nano (5th generation)
  - iPod nano (4th generation)
  - iPod classic 120GB 160GB (2009)
  - iPod shuffle (4th generation)
  - iPod shuffle (3rd generation)
  - iPhone 4S
  - iPhone 4
  - iPhone 3GS
  - iPad (3rd generation)
  - iPad 2
  - iPad

## System requirements for battery charge using USB

Personal Computer with pre-installed with any of the following operating systems and USB port:

### Operating Systems

- When using Windows\*
  - Windows\* 7 (Home Premium / Professional / Ultimate / Starter) (including 64 bit version)
  - Windows Vista\* (Service Pack 2 or later) (Home Basic / Home Premium / Business / Ultimate) (including 64 bit version)
  - Windows\* XP (Service Pack 3 or later) (Home Edition / Professional / Media Center Edition 2004 / Media Center Edition 2005)
- When using Macintosh
  - Mac OS X (version.10.5 or later)

Windows and Windows Vista are registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries. Macintosh and Mac OS are trademarks of Apple Inc., registered in the U.S. and other countries.

## Specifications

### General

Type	Closed, dynamic
Driver units	50 mm, dome type
Power handling capacity	100 mW
Impedance	51 Ω at 1 kHz (when the power is on) 19 Ω at 1 kHz (when the power is off)
Sensitivity	103 dB/mW (when the power is on) 100 dB/mW (when the power is off)
Frequency response	5 Hz – 24,000 Hz
Total Noise Suppression Ratio <sup>1)</sup>	Approx. 25 dB <sup>2)</sup>
Power source	DC 3.7 V Built-in lithium-ion rechargeable battery or DC 5 V USB
Mass	Approx. 330 g (11.7 oz) (without cord)
Talk microphone and microphone cord for iPod/iPhone/iPad	Open circuit voltage level (Inline remote and microphone cord for iPod/iPhone/iPad) -42 dB (0 dB = 1 V/Pa)

### Headphones charging and usage time

Approx. charging hours	Approx. usage hours <sup>3)</sup>
4 hours <sup>4)</sup>	22 hours <sup>5)</sup>
